

Mench Financial, Inc. Markets Outlook 3Q 2025

With the composite US Treasury yield curve staying at 4.6% and coupon yields at historical norms, we believe fixed income securities will produce positive normalized returns for the next 12 months. We will be favoring intermediate-term investment grade bonds going forward.

We are projecting equities will produce positive normalized returns and are continuing to prioritize domestic over international stocks. Based on this outlook, we will favor equities over bonds in blended accounts.
